► Film Sealing Machine

► The Optimum in Packaging

► www.kohmann.de

► Immediately Visible

A real innovation: Gable-top Cartons and Brick-Packaging with Windows. Instead of glueing, the packaging is simply sealed – absolutely tight and reliable. The result is literally something worth looking at. Your product is immediately visible and makes its presence felt at a glance.

Almost any packaging can be improved in this way, so that the most important item catches the eye – your product. Now can there be a better selling point than the product itself?

► At the Centre of Attention

You can hardly present your product in a form which captures more attention or is more strongly focussed. A great benefit is the practical volume indicator. This makes many products even more attractive.

Put your product at the centre of attention – with packaging which offers so much more:

- Visible window
- Reliable sealing
- Centre of attention
- Informative level indicator
- Liquid and dry food
- What else can you think of?

► Technical Data

blank length	201,5 mm x 385 mm
blank width	max. 400 mm
package volume size	from 0,5 up to 1,5 litre (other sizes upon request)

Space required

length	approx. 9000 mm
width	approx. 2000 mm
height	approx. 1800 mm

Weight

Main machine	approx. 7000 kg
